REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance. The prior art fails to show a composite reflector with the following features:

1) a pair of longitudinal reflecting surfaces extending axially and outwardly from lower limits adjacent the upper edges and laterally spaced apart by the row of substantially circular reflecting surfaces to define a trough axially thereabove as recited in claim 1; and

2) a pair of longitudinal reflecting surfaces extending upwardly and outwardly from a lower edge substantially tangent to the rims, the longitudinal reflecting surfaces being laterally separated from each other by a distance substantially equal to the diameter of the rims, the pair of longitudinal reflecting surfaces extending substantially the length of the linear LED array and defining a trough above the row of concave reflecting surfaces as recited in claim 9.

Perlo et al. (U.S. Patent 6,641,282) is the most pertinent reference, but it fails to disclose the troughs adjacent the *upper rims* of the substantially circular reflecting surfaces.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
